

On 4th July at the end of the Swim Hertfordshire ACM an announcement was made that Swim England Hertfordshire have begun the process to build their own 50m pool.

This huge undertaking by the County Association is in the early stages but will ideally be a facility that caters for ALL our aquatic disciplines. The focus of the facility will be competitive training and events.

The county have set up a limited company Hertfordshire Aquatics and are in the process of registering it as a charity. This company will oversee the project and run the facility when it is built.

A preferred location has been identified with a very enthusiastic partner. We have been advised not to reveal the location/partner until contracts have been signed

Swim England Hertfordshire are now seeking support from various bodies in order to help us raise the necessary funding.
